SUMMARY

Motivated Computer Engineering undergraduate with hands-on experience in UX/UI design, product thinking, and cross-functional collaboration. Completed a 6-month UX/UI Designer internship, working on real-world products from research to high-fidelity prototypes. Strong interest in technology-driven business and operations, seeking a full-time role through Shopee Graduate Development Program (GDP) or Future Operations Leaders Program (FLP) to grow into a future leader in the e-commerce ecosystem.

WORK EXPERIENCE

Internship at CubeSoftTech Co., Ltd. (6 months)

Jun 2025 - Dec 2025

- Designed user-centered interfaces for both internal tools and client-facing platforms, with strong emphasis on usability, clarity, scalability, and consistency.
- Conducted user research, user journey mapping, and pain-point analysis to identify UX gaps and translate insights into actionable design improvements.
- Produced wireframes, high-fidelity mockups, and interactive prototypes using Figma, enabling rapid iteration through continuous feedback from developers and stakeholders.
- Collaborated cross-functionally with developers, product owners, and business teams to ensure design solutions aligned with technical feasibility and business objectives.
- Contributed to improved development efficiency by standardizing UI components and establishing reusable design patterns across projects.
- All related projects, design works can be found via the attached portfolio link.

Restaurant Reservation App

2024

- This project demonstrates expertise in UX/UI design, advanced prototyping techniques, and the ability to create functional, user-centric applications. Detailed visuals and documentation of the app's design and functionality can be found in the attached portfolio.
- Key highlights of the project : Implemented advanced prototyping in Figma, utilizing variables and conditions to simulate realistic user interactions, such as dynamically updating menu statuses, customizing menu options, and handling user inputs.

ClickCamp 14 (Photographer and PR)

2023

- Participated as a Photographer and PR Representative for ClickCamp 14, a camp designed for high school students interested in Computer Engineering at Mahidol University.
- Social Media Engagement: Increased audience interaction through creative content and promotional videos, where I acted as a spokesperson, showcasing camp highlights and driving participation.

EDUCATION

Mahidol University

2022-now

Faculty of Engineering, Department of Computer Engineering

- Year 4, expected graduation in 2026

Saint Gabriel's College

2010-2022

Smart Room program (Grade 5 -Grade 9)

SKILLS

- **Design Skills:** User journey creation, satisfaction survey form design, wireframe, mockup, prototype development, animation in Figma
- **Development Skills:** Python, C, MySQL, basic HTML & CSS, Assembly (AVR), Deep learning
- **AI Integration:** Proficient in creating AI prompts for specific tasks
- **Tools & Software:** Figma, Photoshop, Canva
- **Languages:** English: IELTS 5.5 (2021)
